GroupAlarm: README

Latest revision: 2015-05-29

A quick-start guide and overlook of the GroupAlarm Android application.

Getting started
1. git clone git://github.com/alexanderhederstaf/groupalarm.git
   or by downloading the application at
   https://github.com/AlexanderHederstaf/groupalarm
2. Open the project using Android Studio
3. Compile the project as an application using Android Studio and run it on your phone

Dependencies
- Java 6 SE development environment
- Android SDK
- A (virtual) Android device

Android SDK targets
- Minimum SDK: 16
- Target SDK: 16

Tests
1. The unit test for the Alarm data class can be run using Android Studio and right clicking the test, then selecting run.
2. All other classes are Activities and their services and can be tested with acceptance tests as specified in the Developer Documentation
